

## Enterprise Backoffice & Automation

# เปลี่ยนขั้นตอนงานที่ซับซ้อน ให้เป็นระบบที่ทำงานแทนคุณ

We design websites, backoffice portals, workflow automation, dashboards and custom web applications around your real business workflow.

### WHAT WE BUILD

#### Corporate Website

Build trust, explain services and capture quality inquiries.

#### Workflow Automation

Digitise approvals, assignments, alerts and audit trails.

#### Custom Web Application

Create purpose-built systems for customers and internal teams.

#### Dashboard & CMMS

See live business data and manage maintenance operations clearly.

## Our approach

1 Discover

2 Architect

3 Build

4 Support

# From business problems to usable systems

## ● 01 Maintenance Management

Replace repair requests in chat with mobile forms, technician assignment, SLA tracking and photo-based work history.

## ● 02 Workflow Approval

Move approval documents into a clear, traceable flow with roles, notifications, digital records and real-time status.

## ● 03 Executive Dashboard

Bring data from spreadsheets and operating systems together so management can see KPIs, trends and decisions in one place.

## Technology selected for the right problem

### Start with a free system assessment

Tell us your current workflow and the result you want. We will help you define a practical first step.
